

**Editorial**

Dear All

It gives us immense pleasure to bring the fifth issue of the journal. The fifth issue has five papers. The first paper is on active euthanasia. The paper argues for legalisation of active euthanasia. The second paper is on protection of human rights by investment tribunals. This paper argues for protection of human rights of investors by invoking MFN clause as one of the ways. The third paper analyses the article 12 of the CEDAW through the lens of four-dimensional substantive equality model. The fourth paper discusses the contemporary issue of Citizenship Amendment Act. The fifth paper argues for a binding human rights regime globally for corporations to better protect human rights.

Thank you!!
